DIAMOND REPORTS

GULF INSTITUTE OF GEMOLOGY

GIG Diamond Reports are exclusively for loose diamonds.

GIG Diamond Report includes the analyses to determine if the sample is a natural diamond, a laboratory grown diamond or a simulant and if it is enhanced (clarity treats and/or color treats).

GIG offers two versions of Diamond Report, an extended one (showing clarity diagram, too) and a compact one. The **compact** version is available for diamonds from 0.10 ct up to 1.99 ct and the **extended** version is available from 0.70 ct diamonds.

WEIGHT	DIAMOND REPORT compact version	DIAMOND* REPORT extended version

COLORED STONE REPORTS

GULF INSTITUTE OF GEMOLOGY

GIG Colored Stone Reports are exclusively for loose gems. GIG offers two versions of Report for colored stones, an **extended** one and a **compact** one depending on the nature of the gem. For the gems planned for the extended version it is possible to ask for an Identification Report or an Origin Report.

The **Colored Stone Identification Report** includes the analyses to determine the kind of gem, if it is natural or laboratory grown and if it has detectable treatments.

The **Colored Stone Origin Reports** contains, when determinable, the opinion of the geographical origin of the gem and all the information of the Identification Report, too.
